# Best Computer Science Journals for Computer Security and Cryptography

The ranking of best journals for Computer Science was published by Research.com, one of the prominent websites for computer science research providing trusted data on scientific contributions since 2014.

The position in the ranking is based on a unique bibliometric score created by Research.com which is computed using the estimated h-index and the number of leading scientists who have endorsed the journal during the last three previous years. [Show more](#)
